AADT Shapefile Information

This document describes the 2008 Annual Average Daily Traffic (AADT) shapefile. All data is provided in Series ArcGIS format and is readily viewed using ArcView or ArcMap software. More information about the software and data format can be found at: http://www.esri.com/

This file contains a total of 40,518 stations providing AADT history from 2002- 2008. The projected coordinate system that is associated with this shapefile is: NAD_1983_StatePlane_North_Carolina_FIPS_3200
Linear Unit: Meter

Disclaimer related to the spatial accuracy of this file:
The data in this file was digitized referencing the available NCDOT, GIS Shapefiles and is not the result of using GPS equipment in the field.

Attribute Table Content Description:

Column Name	Field Properties	Description
CVRG_VLM_I	Numeric Format = Numeric Type = Double Precision = 18 Scale = 5	Unique identifier for each of the 40,955 stations
ROUTE	Text Type = String Length = 254	Numbered route identifier, or local name if not State maintained
LOCATION	Text Type = String Length = 80	Description of the station location
YEAR 2002- 2008	Numeric Format = Numeric Type = Double Precision = 18 Scale = 5	Annual Average Daily Traffic (AADT) volume Note: A value of zero indicates no available AADT for that year
